Quick Start Guide

DF Sports Arena - Complete Setup

Follow these steps to get your project running locally.

Step 1: Install Node.js

Download and install Node.js 18+ from nodejs.org

Step 2: Set Up MongoDB Atlas

1. Go to mongodb.com/cloud/atlas
2. Create free account
3. Create free cluster (M0 Sandbox)
4. Click "Connect" → "Connect your application"
5. Copy connection string
6. Replace `<password>` with your database user password

Step 3: Set Up Backend

```
# Go to backend directory
cd backend

# Install dependencies
npm install

# Create .env file
cp .env.example .env

# Edit .env and add your MongoDB URI

# Seed database with sample data
npm run seed

# Start server
npm run dev
```

Step 4: Open Frontend

```
# Go back to project root
cd ..

# Open in browser or use local server
npx serve .
```

Step 5: Access Admin Panel

1. Go to `backend/admin/login.html`
2. Login with:
   - Email: `admin@dfsportsarena.com`
   - Password: `Admin@123`

Optional: Enable WhatsApp Notifications

1. Create Twilio account at twilio.com
2. Get Account SID and Auth Token
3. Add to `.env`:

```
TWILIO_ACCOUNT_SID=your-sid
TWILIO_AUTH_TOKEN=your-token
```

Optional: Enable Image Uploads

1. Create Cloudinary account at cloudinary.com
2. Get Cloud Name, API Key, API Secret
3. Add to `.env`:

```
CLOUDINARY_CLOUD_NAME=your-cloud
CLOUDINARY_API_KEY=your-key
CLOUDINARY_API_SECRET=your-secret
```
