Project Overview

DF Sports Arena is a responsive website for managing a football arena, featuring:

- Public website for visitors to view matches, flyers, and gallery
- Online booking system for pitch reservations
- Admin dashboard for managing content and bookings
- WhatsApp integration for quick bookings and notifications

Features

Public Website

- **Homepage** - Hero section, upcoming matches, booking CTA
- **Matches** - Upcoming matches with ticket booking
- **Flyers** - Event flyers gallery
- **Gallery** - Photo gallery with lightbox
- **Booking** - Full booking form with API integration
- **Contact** - Contact information and location map

Backend API

- RESTful API with Node.js/Express
- MongoDB database with Mongoose ODM
- JWT authentication
- Email and WhatsApp notifications
- Image upload with Cloudinary

Admin Dashboard

- Dashboard with statistics

- Booking management (approve/cancel)
- Match scheduling
- Flyer management
- Gallery management
- Pricing configuration
- Settings management

```

Frontend Setup

The frontend is a static website that works independently but can integrate with the backend API.

Running Locally

1. Simply open `index.html` in a browser, or

2. Use a local server:

```
# Using Python
python -m http.server 3000
```

```
# Using Node.js
npx serve .

# Using PHP
php -S localhost:3000
```

3. Visit `http://localhost:3000`

Backend Setup

Prerequisites

- Node.js 18+
- MongoDB Atlas account (free tier available)
- Cloudinary account (optional, for image uploads)
- Twilio account (optional, for WhatsApp)

Installation

1. **Navigate to backend directory:**

```
cd backend
```

2. **Install dependencies:**

```
npm install
```

3. **Create environment file:**

```
cp .env.example .env
```

4. **Configure environment variables** in `.env`

5. **Seed the database** (creates admin user and sample data):

```
npm run seed
```

6. **Start the server:**

```
# Development mode
npm run dev
```

```
# Production mode
npm start
```

7. **Server runs on:** `http://localhost:5000`

Admin Panel

Access

- Go to: `backend/admin/login.html`

Default Credentials

After running `npm run seed`:

- **Email:** `admin@dfsportsarena.com`
- **Password:** `Admin@123`

Admin Features

Page	Features
Dashboard	Statistics, recent bookings, revenue
Bookings	View, approve, cancel bookings
Matches	Add, edit, delete matches
Flyers	Add, edit, delete event flyers
Gallery	Upload, delete gallery images
Pricing	Update pricing tiers
Settings	Arena settings, contact info

API Documentation

Base URL

```
http://localhost:5000/api
```

Public Endpoints

Method	Endpoint	Description
GET	`/matches?upcoming=true`	List upcoming matches
GET	`/flyers`	List active flyers

Method	Endpoint	Description
GET	`/gallery`	List gallery images
POST	`/bookings`	Submit booking
GET	`/bookings/availability?date=YYYY-MM-DD`	Check availability
GET	`/settings/public`	Get public settings

Protected Endpoints (Admin Only)

Method	Endpoint	Description
POST	`/auth/login`	Admin login
GET	`/admin/dashboard`	Dashboard stats
GET/POST/PUT/DELETE	`/bookings`	Booking management
GET/POST/PUT/DELETE	`/matches`	Match management
GET/POST/PUT/DELETE	`/flyers`	Flyer management
GET/POST/DELETE	`/gallery`	Gallery management
GET/PUT	`/pricing`	Pricing management
GET/PUT	`/settings`	Settings management

Environment Variables

Create `.env` in `backend/` directory:

```
# Server
NODE_ENV=development
PORT=5000

# MongoDB (Required)
MONGODB_URI=mongodb+srv://<user>:<pass>@cluster.mongodb.net/dfsportsarena

# JWT (Required)
JWT_SECRET=your-secret-key
JWT_EXPIRES_IN=7d

# Cloudinary (Optional)
CLOUDINARY_CLOUD_NAME=your-cloud
CLOUDINARY_API_KEY=your-key
CLOUDINARY_API_SECRET=your-secret

# Twilio WhatsApp (Optional)
TWILIO_ACCOUNT_SID=your-sid
TWILIO_AUTH_TOKEN=your-token
TWILIO_WHATSAPP_FROM=+14155238886
```

```
# Email (Optional)
SMTP_HOST=smtp.gmail.com
SMTP_PORT=587
SMTP_USER=your-email@gmail.com
SMTP_PASS=your-app-password

# Arena Contact
ARENA_PHONE=+256776057501
ARENA_WHATSAPP=256776057501
ARENA_EMAIL=info@dfsportsarena.com
FRONTEND_URL=http://localhost:3000
```

Deployment

Frontend

Deploy static files to Netlify, Vercel, GitHub Pages, or any static hosting.

Backend

Deploy to Railway, Render, Heroku, or any Node.js hosting.

Built with ♥ for DF Sports Arena, Adjumani, Uganda
